THE METALLIC PAINT, produced by the PATENT ALKALI COMPANY, has been extensively used for several years on farm buildings, iron bridges, roofs, and railings, shipping, &c., and it is universally admitted that it covers a greater surface than any other pigment, and stands far better on wood, iron, Portland stone, and Roman cement, than the ordinary paints. Fine black, 2d. per ton; rich purple brown 3d. per ton.

Company's offices, 1, New Broad-street, London.

JOHN A. WEST, Secretary.

PURE PATENT WHITE ZINC PAINT of the VIEILLE MONTAGNE ZINC MINING COMPANY. This Company having become Proprietors of all rights and patents of the late Patent White Zinc Company in France and Belgium, is prepared to SUPPLY THE PAINT on a large scale, the WHITE OXIDE of ZINC in a PURE STATE, and of a quality which can only be manufactured from the Zinc from their Mines in Belgium. The Patent White Zinc Paint is superior in every respect to white lead paint. It is entirely free from all poisonous properties, and is not affected by sulphuretted hydrogen, or any gases or exhalations whatever, to which white lead paint is subject, and which turns it quite black. White zinc paint causes none of those terrible complaints to arise which manufacturers and others are subject to, and to which persons who inhabit newly painted apartments are more liable. A spurious article having been introduced in the market under the name of White Zinc Paint, the Public is cautioned against it, because, when adulterated, it becomes a very inferior paint, instead of a very rich one. For further particulars and Prospectuses apply to Mr. H. F. BECHMOLL, General Agent for England and Scotland, at the Company's offices, 13, Manchester-buildings, Westminster; Bristol, Liverpool, Leeds.

DAMP WALLS.—New PATENT PAINT, a guaranteed remedy, will dry in a few hours, and may be immediately papered over.—J. BELL and Co., steam mills, 3, Wellington-street, Strand, street.

PATENT WHITE ZINC PAINT.— JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on wholesale terms. It is free from all poisonous qualities; it is unaffected by sea water, sulphuretted hydrogen, or any of the gases; and preserves its original colour where white lead paint will not.—Prospectuses to be had at J. Warner and Sons', 8, Cresent, Jewin-st., London.

HUBBUCK'S PATENT WHITE ZINC PAINT—ANNOUNCEMENT.

For MARINE USES, it possesses the following advantages:—It is a perfect remedy against Dry Rot, and retards the Whiteness for years, unaffected by bilge-water, or noxious vapours from cargo. The White Paint on the hold of a ship, after discharging a foreign cargo, is found to be as white as the day before, when newly painted. Ships painted with it, and other parts of vessels, after several hitherto known, and tried has failed, the "White Zinc Paint" has preserved the freshness of its colour. Moreover, brightness of the gas-coal arises on iron it causes the paint, and forms an amalgam of the two metals, which protects the iron from rust, decay, or corrosion.

For the GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unsurpassed in whiteness, clearness of colour, durability, and beauty of texture. It becomes a ready and economical substitute for the British and French materials.

For SANITARY PURPOSES the "White Zinc Paint" is unobjectionable, and quite from its being totally free from every known local impurities to banish, by from its combustible chemical qualities which, from the peculiar refractory where ordinary white lead paints have prevailed, formidable or insidious ailments with it are at once disinfected. Hospitals and Painters Chalks are assisted by its use, as well as similar reasons to the occupants of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children of the most delicate constitution. It becomes cheaper than ordinary paint, from its expenditure over a much larger surface. A coat of this paint covers as much as to usually spread by 1 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London—Patent," as the style of the Manufacturers. A circular with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Dock.

A SPIRAL STAIRCASE, IRON, an IRON GIRDER, 21 feet long, and two others small, and TWO STABLE FITTINGS, ready to be DISPOSED OF by PRIVATE CONTRACT, together or separate.—May be seen, and further particulars obtained, by applying to the FOREMAN, Langham Bazaar Office, Langham place, Regent-street.

LAWRENCE and CO., 55, Parliament- street, Westminster, and 5, York-place, Lambeth, Manufacturers and Dealers in Zinc, &c.—Flashing, Chimney Shafts in any form, various sorts of chimney-cowls and tops, perforated zinc in sheets, &c., per foot; rain pipe, 3 in., 6d. per foot; lead traps, &c. Shades in various colours, drawn flat, &c., to order. Zinc or brass plates supplied or engraved in best manner. Spelter and sheet zinc and lead at lowest market prices.

NOISELESS RINGS.

GUTTA PERCHA CURTAIN and CORNICE RINGS.—These rings have been much approved by the public, particularly for curtains and fancy cornices. Owing to the peculiar properties of Gutta Percha, these rings do not make a noise when sliding along the pole or rod. The fullest sizes may be had, either with or without hangers.—Sizes: 1 inch diameter, 1½ inch, 2 inch, 2½ inch, 3 inch, 3½ inch, 4 inch.
